

GARRETT FARRELL BEEGHLY

155 Weill Hall, Cornell University, Ithaca, NY 14853

gfb48@cornell.edu | [@GarrettBeeghly](https://twitter.com/GarrettBeeghly) | gbeeghly.github.io

EDUCATION AND TRAINING

Cornell University College of Engineering

PhD in Biomedical Engineering

MS in Biomedical Engineering

Ithaca, NY

2018 – Present

2018 – 2021

University of Cambridge Medical Research Council

Whitaker Research Fellow

Cambridge, UK

2017 – 2018

University of Virginia School of Engineering and Applied Science

BS in Biomedical Engineering, GPA: 3.99 of 4.00

Charlottesville, VA

2013 – 2017

AWARDS AND HONORS

Kirschstein National Research Service Award (F31) National Cancer Institute

July 2023

Caroline Coffey Fund Travel Award Cornell University

December 2022

Teaching Assistant of the Year Meinig School of Biomedical Engineering

August 2021

Center for Teaching Innovation Fellowship Cornell University

June 2021

NSF Graduate Research Fellowship National Science Foundation

May 2019

Presidential Life Science Fellowship Cornell University

August 2018

Fischell Bioengineering Scholarship Cornell University

August 2018

Tau Beta Pi Fellowship Tau Beta Pi National Engineering Honor Society

May 2018

Whitaker Research Fellowship Institute of International Education

March 2017

Harrison Undergraduate Research Award University of Virginia

March 2016

Rodman Honors Scholarship University of Virginia

August 2013

RESEARCH EXPERIENCE

Cornell University Graduate Research Assistant

Ithaca, NY

Advisor: Claudia Fischbach, PhD

August 2018 – Present

- Developed protocols to isolate, culture, and analyze populations of primary adipocytes stratified by cell diameter from human or mouse donors.
- Examined how adipocyte hypertrophy influences breast cancer progression and tumor cell behavior independently of body mass index.

Max Planck Institute for the Science of Light Visiting Scientist

Erlangen, DE

Advisor: Jochen Guck, PhD

June 2023

- Isolated primary adipocytes from lean and obese mice for mechanical analysis.
- Performed Brillouin microscopy and atomic force microscopy to assess adipocyte mechanics as a function of mouse diet and cell diameter.

New York – Presbyterian Hospital NIH-T35 Trainee

New York, NY

Advisor: Jason Spector, MD

June 2019 – July 2019

- Compared the extracellular matrix composition of human mammary adipose tissue across demographics including age, race, body mass index, and menopause status.
- Established a protocol for decellularizing human mammary adipose tissue to isolate extracellular matrix components for inclusion in tissue-engineered models of breast cancer.

University of Cambridge Whitaker Research Fellow

Advisor: Jacqueline Shields, PhD

Cambridge, UK

August 2017 – July 2018

- Developed a microfluidic system to model the tumor-draining lymph node.
- Monitored changes in lymph node immune cell composition, localization, and activation status via immunofluorescence, live imaging, and flow cytometry.

University of Virginia Undergraduate Research Assistant

Advisor: Jennifer Munson, PhD

Charlottesville, VA

March 2015 – May 2017

- Assessed stromal heterogeneity across glioblastoma and breast cancer patient samples via immunohistochemistry and correlated the quantified metrics with clinical outcomes.
- Developed a 3D tissue-engineered model of metastatic breast cancer to investigate how tumor cell behavior is modulated by microenvironmental cues after metastasis to the brain.

TEACHING EXPERIENCE

Cornell University Center for Teaching Innovation Fellow

Advisor: Derina Samuel, PhD

Ithaca, NY

Fall 2021 – Spring 2023

- Participated in regular meetings focused on strengthening my teaching abilities including curriculum development, active learning strategies, inclusive assessments, and more.
- Developed and led workshops as well as annual university-wide conferences on these topics for other graduate students and postdocs interested in teaching at Cornell.

Yale University Guest Lecturer

Instructor: Corey O'Hern, PhD

New Haven, CT

Fall 2021 – Fall 2023

Course: Physical Biology Integrated Workshop (MBB 591)

- Lecture provided first-year graduate students with an overview of cancer classification, pathogenesis, and clinical management with a specific focus on breast cancer.
- Students subsequently used this information to simulate tumor invasion dynamics via discrete element method (DEM) models.

Cornell University Graduate Teaching Assistant

Instructors: Shivaun Archer, PhD and Claudia Fischbach, PhD

Ithaca, NY

Fall 2020

Course: Laboratory Techniques for Molecular, Cellular, and Systems Engineering (BME 4190)

- Course introduced students to laboratory techniques including cell culture, flow cytometry, stem cell differentiation, RT-qPCR, viral transfection, hydrogel fabrication, transcriptomics, chromogenic and immunofluorescence staining, spheroid culture, and confocal microscopy.
- Responsibilities included updating protocols, preparing reagents, demonstrating lab techniques, holding office hours, grading lab reports, writing and grading exams.

University of Virginia Undergraduate Teaching Assistant

Instructor: Timothy Allen, PhD

Charlottesville, VA

Summer 2016

Course: Integrative Design and Experimental Analysis Lab (BME 3080)

- Course introduced students to common biomedical laboratory techniques including cell culture, immunofluorescence, Western blotting, and RT-qPCR.
- Responsibilities included preparing reagents for lab, leading and instructing students, demonstrating proper lab technique, holding office hours, and grading exams.

INVITED TALKS

GF Beeghly. Let's put cancer in context. What is the tumor microenvironment? Cancer Research Education Day for Patients and Survivors. *Cornell Community Cancer Partnership, Ithaca, New York, October 2022. Invited speaker.*

GF Beeghly. Pursuing interdisciplinary cancer research in graduate school. *Cancer Systems Biology Consortium and Physical Sciences Oncology Network Summer Undergraduate Research Program, National Cancer Institute, July 2021. Invited panelist.*

GF Beeghly. Primer for the Distinguished Lecture in Cancer Biology given by Dr. Mina J. Bissell. Why don't we get more cancer? The critical role of extracellular matrix and microenvironment in malignancy and dormancy. Life Sciences Lecture Series. *Cornell College of Veterinary Medicine, Ithaca, New York, November 2019. Invited speaker.*

GF Beeghly, JA Aird, Y Wang. How to write a successful application for the National Science Foundation Graduate Research Fellowship Program. *Cornell Graduate School, Ithaca, New York, September 2019. Invited panelist.*

GF Beeghly. Let's put cancer in context. What is the tumor microenvironment? Cancer Research Education Day for Patients and Survivors. *Cornell Community Cancer Partnership, Ithaca, New York, September 2019. Invited speaker.*

LEADERSHIP, MENTORSHIP, AND OUTREACH

Reviewer for *Science Advances* (AAAS), *Nature Methods* (Springer Nature), *Cell Reports* (Cell Press), *NPJ Breast Cancer* (Springer Nature), and *Advanced Biology* (Wiley).

Cornell Community Cancer Partnership

Ithaca, NY

Cancer Resource Center of the Finger Lakes

Fall 2018 – Present

- Delivered the first presentation for the inaugural Cancer Research Education Day which included over 40 cancer patients and survivors from upstate New York.
- Participated in seminars between cancer patients, survivors, and researchers designed to promote dialogue between these communities.

Mentor for Undergraduate Research

Ithaca, NY

Meinig School of Biomedical Engineering, Cornell University

Fall 2021 – Spring 2024

- Mentored Marlee Pincus, an undergraduate student in Biological and Environmental Engineering, who pursued independent research projects to complement my own experiments.

- Under my mentorship, Marlee received a Cornell Engineering Learning Initiatives Grant and presented her findings at the 2023 Biomedical Engineering Society Annual Meeting.

Special Session on Engineering and Physical Sciences in Oncology

Seattle, WA

Biomedical Engineering Society Annual Meeting

October 2023

- Co-chaired and organized a special session on Integrating Engineering and Physical Sciences in Oncology at the 2023 Biomedical Engineering Society Annual Meeting.
- Coordinated a panel of three keynote faculty speakers and solicited, reviewed, and selected applications for an additional five trainee speakers.

Diversity, Equity, and Inclusion Committee

Ithaca, NY

Meinig School of Biomedical Engineering, Cornell University

Fall 2021 – Spring 2023

- Met with prospective faculty candidates to discuss topics pertaining to diversity, equity, and inclusion and provided feedback about candidates to the hiring committee.
- Helped develop and coordinate a seminar series to highlight diversity within our own department and to invite external speakers to discuss issues related to equity and inclusion.

Ivy Plus Teaching Transformations Graduate Summit

New York, NY

Center for Teaching and Learning, Columbia University

Spring 2023

- Participated in a multi-university summit to discuss transformative teaching practices as a representative of the Cornell University Center for Teaching Innovation.

AIMBE Public Policy Institute for Rising Leaders

Washington, DC

American Institute for Medical and Biological Engineering

Fall 2019

- Participated in a multi-day institute focused on how public policies influence biomedical research and the role scientists have as stakeholders in shaping legislation.

Girl Scout Engineering Days

Ithaca, NY

Cornell Graduate Chapter of the Biomedical Engineering Society

Spring 2019 – Fall 2019

- Developed and led hands-on learning activities about imaging modalities in medicine for over 100 visiting Girls Scouts to promote enthusiasm about science and engineering.

Graduate Student Outreach Program

Enfield, NY

Cornell University Public Service Center

Spring 2019

- Developed and taught four classes about human health and medicine in collaboration with a local teacher at Enfield Elementary School.

SKILLS AND KNOWLEDGE

Laboratory techniques

Aseptic cell culture, 3D cell culture, spheroid culture, primary cell isolation, mouse handling and care, rheology, natural biomaterials, atomic force microscopy (AFM), confocal microscopy, fluorescence lifetime imaging microscopy (FLIM), immunofluorescence, immunohistochemistry, flow cytometry, fluorescence-activated cell sorting (FACS), magnetic-activated cell sorting (MACS), ELISA, RNA isolation, RT-qPCR, bulk transcriptomics, Western blotting, extracellular vesicle purification, microfluidics, Seahorse metabolic flux assays.

Languages and software

R, Bash, HTML, Java, MATLAB, ImageJ, FlowJo, GraphPad Prism, Adobe Illustrator.
